The Legal Equation		
Causality	=	Cause in fact
	+	legal or proximate cause.
Cause in fact	=	“But for” the defendant’s criminal act, the victim would not be injured or dead.
Legal or proximate cause	=	Whether it is just or fair to hold the defendant criminally responsible.
Intervening acts	=	Coincidental intervening acts limit liability where unforeseeable; responsive intervening acts limit liability where unforeseeable and abnormal.
