Vietnam	Not Free	76	14	22	28
Zambia	Partly Free	38	11	11	17
Zimbabwe	Not Free	84	16	24	30

Showing 1 to 65 of 65 entries

3. Paste into Excel.

4. Check column names, data format, edit if necessary. Save as .csv file.

The screenshot shows two instances of the Microsoft Excel application. The top instance shows the 'Paste' menu option selected, with a text box indicating '3. Paste into Excel.' The bottom instance shows the data pasted into a spreadsheet. The columns are labeled 'country', 'netfree.ord', 'netfree.total', 'netfree.access', 'netfree.content', and 'netfree.users'. The data rows correspond to the countries listed in the table above. A text box in the top right of the Excel window indicates '4. Check column names, data format, edit if necessary. Save as .csv file.'

5. Use read.csv function to open file in R.
