## Managing time

### STUDENT HANDOUT

Work with your group members to develop an idea for a time management app aimed at students. You only need to develop an idea for your app, not actually design the app. Once you have developed your idea you will pitch it to your classmates when we next meet. The best app will be chosen at the end of the session, so ensure that your app is innovative, creative, interesting and useful, and that it will help students to take control of their time while they are studying (you will need to develop a good understanding of time management issues to do this effectively).

There are various time management apps available on the market. However, it is important that you develop your own ideas, rather than copy existing apps. When we next meet and you pitch your ideas, other students will be able to spot if you have copied an existing app, so ensure that you discuss and come up with innovative and new ideas with your group mates.

**Learning outcome:** By the end of this activity you will have a greater understanding of how to manage your time effectively and will be able to apply this understanding to your studies as your course progresses.
