

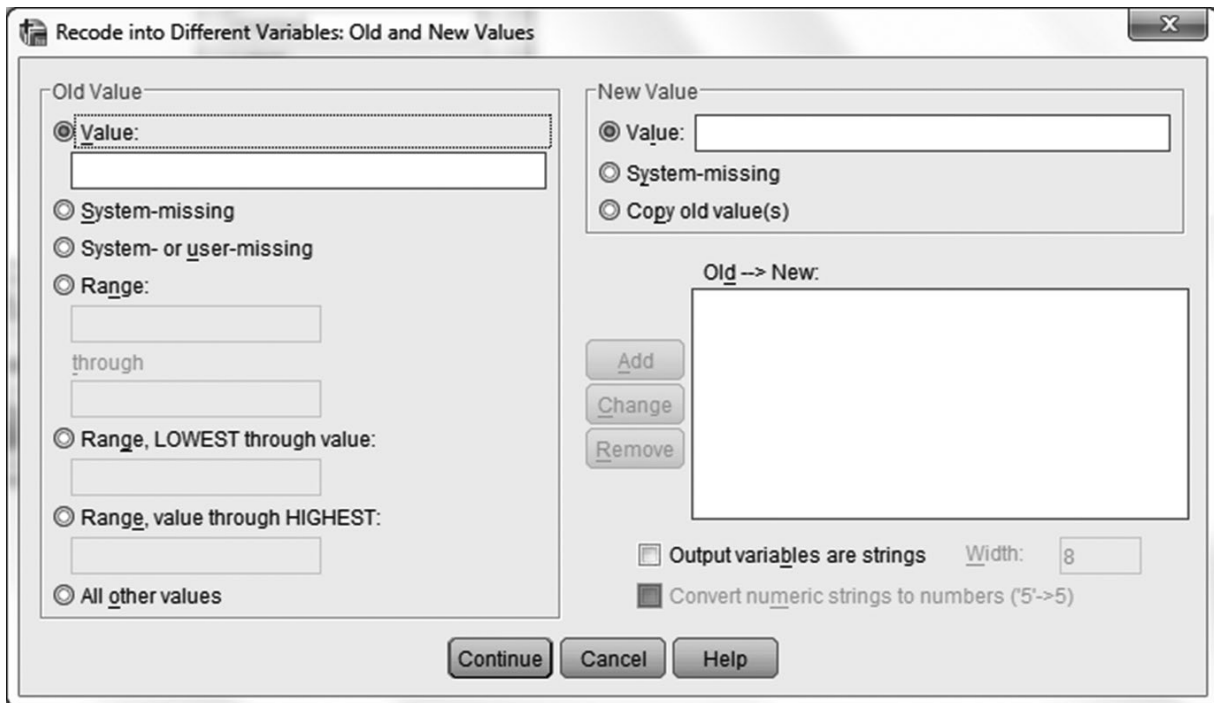

Figure 3-4 Recode into Different Variables: Old and New Values Window (default)

The image shows the 'Recode into Different Variables: Old and New Values' dialog box in SPSS. The window has a title bar with a close button (X). The main area is divided into two columns: 'Old Value' and 'New Value'. In the 'Old Value' column, the 'Value:' radio button is selected, with an empty text box below it. Other options include 'System-missing', 'System- or user-missing', 'Range:' (with two empty boxes and a 'through' label), 'Range, LOWEST through value:' (with one empty box), 'Range, value through HIGHEST:' (with one empty box), and 'All other values'. In the 'New Value' column, the 'Value:' radio button is selected, with an empty text box. Other options are 'System-missing' and 'Copy old value(s)'. Below these columns are three buttons: 'Add', 'Change', and 'Remove'. To the right of these buttons is a large empty box labeled 'Old --> New:'. At the bottom right, there are two checkboxes: 'Output variables are strings' (unchecked) and 'Convert numeric strings to numbers ('5'-->5)' (checked). A 'Width:' label with a value of '8' is next to the first checkbox. At the bottom center are three buttons: 'Continue', 'Cancel', and 'Help'.

Recode into Different Variables: Old and New Values

Old Value

☒ Value:

☐ System-missing

☐ System- or user-missing

☐ Range:

through

☐ Range, LOWEST through value:

☐ Range, value through HIGHEST:

☐ All other values

New Value

☒ Value:

☐ System-missing

☐ Copy old value(s)

Old --> New:

Add

Change

Remove

☐ Output variables are strings Width: 8

☒ Convert numeric strings to numbers ('5'-->5)
