05/15/13 - MCPD

There have been **more than a dozen** similar burglaries of **Radio Shack** locations throughout VA and MD since January 3, 2013. These burglaries share the common M.O. elements below:

- **Rock or brick** was used to **smash the front door**
- suspect goes to the **stock area** of the store (rear), targeting the "cage" and other easily accessible valuables
- **small tools** (bag, screwdriver, crow bar, etc.) are **brought to the scene** by the suspect

Two similar burglaries of an **AT&T store** and **Verizon store** in close temporal and spatial proximity to two Radio Shack burglaries in Maryland appear to be related to this series as well.

The suspect is believed to be a **BLACK MALE** who is tall and thin wearing the pictured **LIGHT-COLORED HOODIE**. He has been observed wearing gloves and a mask in recent surveillance video.

There are similar, but unconfirmed reports taken by the **Anne Arundel, Bel Air, Baltimore City, Baltimore County, Greenbelt, Laurel and Prince George's County** and police departments in Maryland as well as the **Henrico County** police department in Virginia. Representatives from these agencies with like cases are requested to contact Det. O'Leary for case comparison.

Detective Kathleen O'Leary
