

Factoring Game Board

1	5	7	4	9
3	0	6	2	7
5	4	8	1	4
9	8	5	3	6
7	6	2	9	8

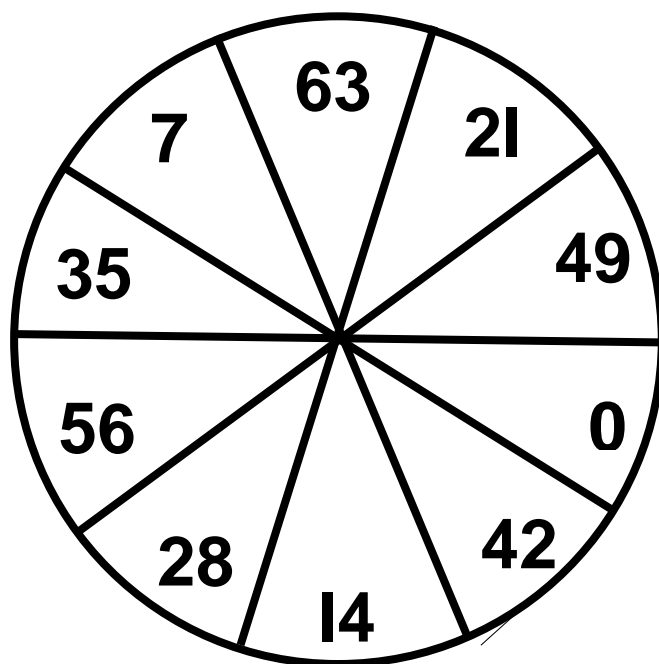

How to play: (Use the “multiples of _” spinner.)

1. Divide the number you spin by the factor listed above the spinner. Use a marker to cover the unknown factor (quotient).
2. Winner is the player who covers 3 in a row.
For example: If you are playing Factoring by 3 and you spin 24 on the “Multiples of 3” spinner, you would cover 8.
