

## BOX 7.2 How to Use SPSS to Select a Subset of Cases

*After opening your data in SPSS and cleaning them:*

>Data

>Select Cases

>If condition is satisfied

>If

*"Variable" → "mathematical operators for condition"*

*For example: "PartyID < 4"*

>Continue

>OK

*At this point, if you enter the data window, you will see slashes through the case numbers for all cases not meeting your criteria.*
