

Mathematical PowerPoints

PP 3-1 *Dotty Arrays*

PowerPoint

PowerPoint 3-1, *Dotty Arrays*, allows learners to practise recognising arrays up to four by four without having to count the number of dots.

PP 3-2 *Area Model for Multiplication*

PowerPoint

PowerPoint 3-2, *Area Model for Multiplication*, shows how the different parts of a 2-digit by 2-digit multiplication fit together.

PP 3-3 *Two Models for Division*

PowerPoint

PowerPoint 3-3, *Two Models for Division*, shows how division may be viewed either as *How many?* or as *Share between*. These two models give rise to different 'pictures in the mind', but they lead to the same set of figures and calculations.
