

SPSS Tip 5.4

Regression lines on a scatterplot matrix

You can add regression lines to each scatterplot in the matrix in the same way as for a simple scatterplot (Figure 5.35). First, double-click the scatterplot matrix in the SPSS viewer to open it in the Chart Editor, then click  to open the *Properties* dialog box. Using this dialog box, add a line to the graph that represents the linear model (this should be set by default). Click  and each panel of the matrix should now show a regression line.
