

Make 10 activity

Intended learning: to give experience with missing addend additions.

Materials: Counters, record sheet (if required), cards 1 to 10 (several of each) – playing cards would be ideal, container.

Description:

- Pairs, threes or fours.
- Player takes a card and puts this number of counters into the container and writes this number onto the record sheet.
- The player then works out how many more are needed to make 10 counters and writes this on the record sheet.
- The player checks this result with the answer on the reverse side of the card.

Note: if desired a player's correct results can be added to achieve a score for the game.
