

(Continued)

The Maritime Security ISAC, is a non-profit, member driven organization representing ocean carriers, cruise lines, port facilities and terminals, logistics providers, importers, exporters and related **maritime industries** throughout the world. Our mission is to advance the security of the United States and the international maritime community by representing maritime interests before government bodies; acting as liaison between industry and government; disseminating timely information; encouraging and assisting in the development of industry-specific technologies; and convening educational and informational conferences for our membership and government partners.

The Multi-State Information Sharing and Analysis Center (MS-ISAC) is a collaborative state and local government-focused **cyber security** entity that is significantly enhancing cyber threat prevention, protection, and response and recovery throughout the states of our nation. The mission of the MS-ISAC is to provide a common mechanism for raising the level of cyber security readiness and response in each state/territory and with local governments. The MS-ISAC provides a central resource for gathering information on cyber threats to critical infrastructure and providing two-way sharing of information between and among the states, territories and with local government.

The Nuclear Energy Institute (NEI) is the policy organization of the **nuclear energy and technologies industry** and participates in both the national and global policy-making process. NEI's objective is to ensure the formation of policies that promote the beneficial uses of nuclear energy and technologies in the United States and around the world.

The PT-ISAC is a trusted, sector-specific entity which provides to its constituency a 24/7 Security Operating Capability that established the sector's specific information/intelligence requirements for incidences, threats and vulnerabilities. Based on its sector-focused subject matter analytical expertise, the ISAC then collects, analyzes, and disseminates alerts and incident reports. It provides to its membership and helps the government understand impacts for their sector. It provides an electronic, trusted ability for the membership to exchange and share information on all threats, physical and cyber, in order to defend **public transportation systems and critical infrastructure**. This includes analytical support to the Government and other ISACs regarding technical sector details and in mutual information sharing and assistance during actual or potential sector disruptions, whether caused by intentional or natural events.

Since the World Trade Center Attacks in September 2001, high-profile office properties, apartment buildings, shopping malls and hotels all have been identified as potential terrorist targets at one time or another. In response, industry organizations have worked with government officials to prevent, detect and respond to terrorist threats and malicious incidents. The **Real Estate** ISAC, a not-for-profit organized by The Real Estate
