

of the occupants will remain in the immediate area around the venue, clogging ingress for emergency responders. Some will head toward public transportation, while others will head toward parking lots to retrieve their vehicles and depart the area.

The main thrust of the attack is at the evacuation points. In the area of the main evacuee collection area (most likely on a main street outside the venue), the UA has placed a Large Vehicle Bomb (LVB) disguised as a fire department/EMS service vehicle. It is conceivable to disguise 10,000 pounds of explosives in such a vehicle, but the actual amount could be scaled down and still achieve severe effects . . . .

Simultaneous to the detonation of the LVB, a second set of devices are detonated in an underground public transportation concourse (e.g., a subway). To accomplish this, pre-positioned IEDs are detonated at strategic points in the concourse. In a third attack, a vehicle bomb is detonated in a parking facility near the entertainment complex.
