

## Assignment

Each student will role-play one of these four HS actors (as assigned by your professor). Each student will prepare a 5- to 10-minute PowerPoint presentation on why his or her program in the domestic or foreign HS theater of operations is likely to have a greater impact on reducing risk per dollar spent, highlighting the HS programs that are most cost-effective in meeting HS challenges. You should use the risk terminology, but you do not actually have to quantify your programs; rather, you can use qualitative terms. Most of the information you need is in the *National Security Strategy* text reproduced below, but you can find additional information on each organization's counterterrorism and HS programs on their websites.

**HINT:** You can also use the Woo paper to guide your analysis (<http://docs.house.gov/meetings/BA/BA00/20130919/101351/HHRG-113-BA00-Wstate-WooG-20130919.pdf>).
