

(Continued)

the threat. And once again, this new information on the severity of the threat results in another update on the actions to be taken, this time in the form of more urgent recommendations to fix the Java or remove it.

January 14—UPDATED RECOMMENDATIONS

We recommend the following actions be taken:

- ▶ Apply the patch from Oracle immediately after appropriate testing.
- ▶ Consider disabling or uninstalling the Java browser plugin on all systems unless there is a valid business need to have it installed.
